

15 YEARS OF BAMBOO STORIES

PORTFOLIO • 2024
BAMBOO CONSTRUCTION ENGINEERING

Asali Bali specializes in modern bamboo buildings incorporating traditional craftsmanship.

We offer a spectrum of highly professional services from structural engineering consultancy to full project delivery. Established in 2009, Asali Bali has evolved in 2017 integrating structural engineers and R&D processes to contribute in the development of bamboo industry in Indonesia and worldwide.

OUR VISION

To develop and promote the bamboo construction industry by engaging:

- Highly skilled artisans from local communities, applying traditional Balinese knowledge in a modern context.
- Engineered and cost-effective bamboo solutions.
- Proven sustainable approach to procurement, design, construction and aftercare.

OUR TEAM

Asali Bali integrated into its teams, structural engineers, project managers and experienced bamboo craftsmen.

Our global approach of the bamboo constructions integrates all the necessary parameters in concordance with the architectural project, in order to comply with local regulations and standards of construction.
